

High School Endorsement Selection Form

Jean Massieu Academy currently offers two endorsement pathways for high school students, **Arts and Humanities** or **Business and Industry**. To graduate with an endorsement students must earn 26 credits which include elective classes in their chosen pathway. Students may choose either pathway and will have the option to change pathways or opt-out of the endorsement program with a parent's signed approval. In addition, students who complete Algebra II and an advanced science within their endorsement plan will receive **Distinguished Level of Achievement** status which provides more college and university opportunities and additional financial aid and grant options.
